CUBE
POLE: 1 1/2" SQUARE

Translucent poles create style without visual weight.

- Glamorous square acrylic hardware mixed with modern metal accessories.
- Translucent poles constructed of 35mm heavy-gauge acrylic built to withstand heavy draperies and daily use.
- One-way or center draw capability.
- C-rings bypass brackets creating a smooth continuous draw.
- To splice two poles utilize a bracket to provide necessary center support.
- Bracket conceals undesirable seams.
- Due to the unique nature of the pole, brackets are recommended every 2 feet to prevent bowing.
- Four drapery rings estimated per foot of pole.

Poles ship via FedEx or UPS.

Translucent poles create style without visual weight.
Innova is a 1 ½” square rod collection benefitting every scenario for visual appeal and operation. It lends itself to contemporary or traditional drapery treatments. Innova is so versatile, it can be motorized, cord drawn or hand drawn. The styling combines glass and modern metal components to create clean lines that drive the minimal hardware trend. As a bending expert, Brimar can custom bend durable metal Innova poles to your exact specifications. If length is a concern, 16-foot poles are available for an extra long span of windows.

POLES CAN BE HAND DRAWN, CORD DRAWN OR MOTORIZED

POLE CUT OPTIONS

- Straight cut DP900
- Mitre cut DP901

CUSTOM BENDING OPTIONS

- Bow bending DP910DIN
- Bay bending DP920DIN

Bends are customized to your specifications. Please provide a template and allow for longer lead times. Custom items are non-returnable. Deposit required.

Please specify the following when ordering:

- **Baton or Corded System**
  - Finished pole length
  - Cord Location: left or right
  - Draw Direction: center, left or right
  - Carrier Type: for pleated or ripplefold drapes
  - Cord Drop Length (standard 96”, Custom lengths available). Note: All cord-drawn systems include a tension pulley. Maximum drapery weight for corded poles and CS tracks: 60 lbs.

- **Motorized System**
  - Finished pole length
  - Motor Location: left or right
  - Draw Direction: center, left or right
  - Carrier Type: for pleated or ripplefold drapes. Note: Heavy fabric weight may require a heavy-duty motor or a tandem motor system. Brimar’s standard motor is capable of handling up to 133 lbs.

Drapery motorization is popular with homeowners and becoming the standard for hotel rooms, meeting venues and conference spaces.

Let us meet your motorization needs with our Innova state-of-the-art MOTRZ Track System.

**MOTRZ** makes spaces stand out in terms of image and functionality.

**MOTRZ** provides a convenient solution for glare reduction and privacy while reducing energy costs and protecting furnishings from UV ray damage.

**MOTRZ** creates a positive user experience with superior performance, reliability and ease of operation.

**MOTRZ** extends the lifespan of draperies by eliminating the damage associated with manual operation.

Motorization systems come pre-assembled with a pole, Brimar’s MOTRZ motor, endstops, 6-channel remote and powercord. Additional parts and fees apply to integrate with home automation systems.

Motorization systems:
- **MOTORIZED SYSTEM DINM08**
  - 8’ Length
- **MOTORIZED SYSTEM DINM12**
  - 12’ Length
- **MOTORIZED SYSTEM DINM16**
  - 16’ Length

**HOW TO ORDER A MOTORIZED SYSTEM**
Please specify:
- Finished pole length
- Motor Location: left or right
- Draw Direction: center, left or right
- Carrier Type: for pleated or ripplefold draperies

Note: Heavy fabric weight may require a heavy-duty motor or a tandem motor system. Brimar’s motor is capable of handling up to 133 lbs.

Call us and we’ll guide you through the ordering process.

- Innova is a modern 1½” square collection featuring versatile draw options.
- Aluminum pole intended for all fabric types.
- Glides/carriers bypass brackets for a long continuous draw. One-way or center draw capability.
- Four drapery glides recommended per foot of pole.
- To splice two poles, position a bracket on each side of the splice for ample support.
- One bracket recommended every 2½ feet.
- For corded option, poles are pre-corded with glides and master carriers for easy installation.
- Please specify cord length and side of cord drop.
- For motorization option, motors are capable of handling up to 133 lbs. Heavy fabric weights and longer system width may require a heavy-duty motor or a tandem motor system.
- Expect longer lead time for cord drawn and motorized systems.

Hardware orders under 10 feet long ship via FedEx or UPS.

- **A modern traverse system to maneuver pleated and ripplefold drapery styles.**
  - Choose from decorative poles or CS tracks in traverse or corded draw options.
  - Corded system is preassembled. Please allow for longer lead times.
  - Aluminum poles and tracks intended to support all fabric types.
  - Ball-bearing glides and ripplefold carriers provide ultra smooth traverse action. Glides and carriers bypass brackets for a long continuous draw.
  - One-way or center draw capability. For center draw treatments use an overlap or underlap master carrier to alleviate a gap between the panels to prevent light from coming through.
  - Order an even number of glides to ensure the drape returns into the wall.
  - Four glides estimated per foot of pole.
  - One bracket recommended every 2½ feet.
  - To splice two traverse poles position a bracket on each side of the splice for ample support.
  - Use Splice Cover DPA7100 to conceal undesirable seam.

BATON OR CORDED SYSTEM
• Finished pole length
• Cord Location: left or right
• Draw Direction: center, left or right
• Carrier Type: for pleated or ripplefold drapes
• Cord Drop Length (standard 96.” Custom lengths available). Note: All cord-drawn systems include a tension pulley. Maximum drapery weight for corded poles and CS tracks: 60 lbs.
RIPPLEFOLD FULLNESS OPTIONS

Ripplefold snap carriers dictate the shape and spacing of your drapery folds. Snap carriers are double sided making them ideal for sheers and room dividers.

60% 1.6 times fullness
80% 1.8 times fullness
100% 2 times fullness
120% 2.2 times fullness

Drapery motorization is popular with homeowners and becoming the standard for hotel rooms, meeting venues and conference spaces.

Let us meet your motorization needs with our Affinity state-of-the-art MOTRZ Track System.

MOTRZ makes spaces stand out in terms of image and functionality.

MOTRZ provides a convenient solution for glare reduction and privacy while reducing energy costs and protecting furnishings from UV ray damage.

MOTRZ creates a positive user experience with superior performance, reliability and ease of operation.

MOTRZ extends the lifespan of draperies by eliminating the damage associated with manual operation.

Motorization systems come pre-assembled with a pole, Brimar’s MOTRZ motor, endstops, 6-channel remote and powercord. Additional parts and fees apply to integrate with home automation systems.

**HOW TO ORDER A MOTORIZED SYSTEM**
Please specify:
- Finished pole length
- Motor Location: left or right
- Draw Direction: center, left or right
- Carrier Type: for pleated or ripplefold draperies

Note: Heavy fabric weight may require a heavy-duty motor or a tandem motor system. Brimar’s motor is capable of handling up to 133 lbs.

Call us and we’ll guide you through the ordering process.

- A sophisticated collection featuring clean lines and versatile draw options.
- Aluminum pole intended for all fabric types.
- Glides/carriers bypass brackets for a long continuous draw. One-way or center draw capability.
- Four drapery glides recommended per foot of pole.
- To splice two poles utilize a bracket to provide necessary center support.
- Bracket conceals undesirable seam.
- One bracket recommended every 2½ feet.
- For corded option, poles are pre-corded with glides and master carriers for easy installation. Please specify cord length and side of cord drop.
- For motorization option, motors are capable of handling up to 133 lbs. Heavy fabric weights and longer system width may require a heavy-duty motor or a tandem motor system.
- Expect longer lead time for cord drawn and motorized systems.

Poles under 108” ship UPS or FedEx. Poles over 108” ship via common carrier truck.
CS TRACKS
TRACK DEPTH: 3/4"

Ideal for homes, restaurants, hotels and meeting venues.

CS TRACKS CAN BE HAND DRAWN OR CORD DRAWN

CORD DRAWN OPTION
To order, select CS track item #, then add corded item # below.
Poles are preassembled for:
Pleated drapes (one-way draw) DIN901KIT
Pleated drapes (center draw) DIN902KIT
Ripplefold drapes (one-way draw) DIN903KIT
Ripplefold drapes (center draw) DIN904KIT
Standard cord drop length is 96." Custom lengths available. Please specify cord length and side of cord drop when ordering.

Please specify the following when ordering a corded system:
• Finished pole length
• Cord Location: left or right
• Draw Direction: center, left or right
• Carrier Type: for pleated or ripplefold drapes
• Cord Drop Length (standard 96." Custom lengths are available).
Note: All cord-drawn systems include a tension pulley.

Maximum drapery weight for corded poles & CS tracks: 60 lbs.

CS Tracks offered with a choice of traverse glides or cord draw options. Corded systems are preassembled. Please allow for longer lead times.

CS tracks intended to support all fabric types.
Ripplefold hardware available to produce tailored draperies with evenly-spaced folds.
Ball-bearing glides and ripplefold carriers provide ultra smooth traversing action.
Glides/carriers bypass brackets for a long continuous draw. One-way or center draw capability.
For center draw treatments use an overlap or underlap master carrier to prevent a gap between the panels to prevent light from coming through.
Order an even number of glides to ensure the drape returns into the wall.
Four glides estimated per foot of pole.
One bracket recommended every 2½ feet.
To splice two traverse poles position a bracket on each side of the splice for ample support.
Use endstops to hold drapery treatments in place.
Poles under 108” ship UPS or FedEx. Poles over 108” ship via common carrier truck.

• A minimalist collection featuring rectangular poles with a finial-free design. Each pole possesses creative individuality.
• Choose from ring drawn or traverse options.
• One-way or center draw capability.
• Maximum pole length is 8 feet for one-way draw treatments. Splicing poles is not recommended.
• Glides or rings bypass brackets for a continuous draw.
• Glide traverse option works best in 8 foot lengths or shorter. Works well for center draw applications over 8 feet.
• Collection designed to support pleated drapery styles.
• Wood pole intended for medium weight fabrics.
• One bracket recommended every 2½ feet.
• Four drapery rings estimated per foot of pole.

RUSSET RUS
A transitional collection of geometric shapes in antique finishes.
• Hand drawn system. Baton recommended.
• No two pieces are alike. Finish variations are to be expected and appreciated.
• Steel pole intended for all fabric types.
• To splice two poles utilize a bracket to provide necessary center support. Bracket conceals undesirable seam.
• One bracket recommended every 2½ feet.
• Four drapery rings estimated per foot of pole.
• Poles ship via FedEx or UPS.
Our specialty is bending poles and providing hardware solutions.

Allow us to custom bend our metal poles, CS tracks or square acrylic poles for your next window treatment project where bow and bay windows reside. French returns are also our specialty.

We make it easy to order custom curved rods in 3 simple steps.
1) Select a collection  
2) Request a quote  
3) Send us a brown-craft paper template ... we’ll do the rest!
ORDERING GUIDELINES

Please indicate the following when placing an order (items are sold individually).

• Select pole diameter, length and finish
• Select corresponding finial and finish
• Select brackets and rings/glides. Please note: When ordering pole lengths over 6 feet, additional brackets are recommended for support.
• Select accessories
• Please let us know of any special instructions when placing an order. Your install date is extremely helpful.

Cord drawn and motorized systems require additional information:

• Finished length of your pole
• Draw direction: center, left or right
• Is this an inside or outside mount?
• Cord or motor location: left or right
• Desired cord drop length? Our standard is 96”
• Please allow 15-20 days for custom motorized or cord drawn product

There are convenient order forms available at brimarinc.com to assist you. Our Client Services team is also available to answer questions during the planning and ordering process. Please refer to bracket guidelines within each collection. We cannot guarantee against sagging due to unsupported pole spans over our recommendations.

HOW TO MEASURE

• To get started, measure the width of the window from the outer frame. To allow for finial and bracket placement outside of the frame, we recommend an additional 2”-4” per side. Installing the brackets into wall studs provides the most secure installation.
• For hardware mounted near a wall or corner, please allow ample room for finial placement.
• When determining the length of your drapery panel, please consider the drop length of the drapery rings shown within each collection.

CUSTOM LENGTHS

Brimar offers poles in increments specified in this catalog and in our price list. Custom cuts including mitre cuts are available upon request. Fall off will be sent upon request only. Please include detailed written instructions with your order. Custom cut hardware is non-refundable and non-returnable. Custom cut orders cannot be cancelled once they are in process.

CUSTOM POLE BENDS

We offer custom bends on many of our collections including bow (continuous), bay and 90 degree bends. A convenient Bending Worksheet is available at brimarinc.com to assist in the quote request and ordering process. A written quote is required and will be provided once we receive your specifications.

Templates are necessary for all bow bends. A template is preferred for bay bends, although providing us with overall dimensions, angles of the bend and dimensions between bends will be accepted. The customer is expected to advise if dimensions are wall measurements or pole measurements when providing the template. There is a 10-15 day lead time on custom bends. Custom pole bends are shipped via common carrier.

INSTALLATION

All hardware should be installed by a professional installer. Brimar is not responsible for damages caused by improperly mounted or inadequately supported hardware. We recommend a center support bracket at all splice points. All cord drawn systems come with a tension pulley that must be installed so the cord is not dangling free.

FINISHES

Many of our finishes are hand-applied by skilled artisans; therefore, no two pieces are exactly alike. Wooden hardware is a product whereby color and grain variations are natural and should be expected. We recommend ordering sampling tools to aid you in your finish selection as finishes can vary.

PRICES

Prices are subject to change without notice. Prices are quoted exclusive of Freight and Handling and are shown in United States currency ($). View our pricing online by logging in to brimarinc.com.

REMEDY OF DEFECT

Brimar warrants that the goods will be free of defects in materials or workmanship; however, seller’s sole obligation shall be to repair or replace, at its option, goods found to be defective. Some handmade items may vary in size.

RETURN POLICY

No returns will be accepted without prior authorization from our Client Services team. No returns after 30 days. Custom cut products and pole bends are non-refundable and non-returnable. A completed Return Authorization Form must be included with the return. A 20% restocking fee applies and return freight must be pre-paid by the customer. Product authorized for return must be in our current price list, in original condition and properly packaged. Credit is issued on returned goods that are inspected and deemed undamaged.

DELIVERY & SHIPPING

All orders are shipped FOB Lake Forest, IL. Pole lengths over 10 feet are shipped via common carrier. Inspect all shipments immediately upon receipt to ensure there is no shipping damage. If there is shipping damage, please contact Brimar within 48 hours to begin the claims process. Freight companies require items to be kept for inspection.
Details make all the difference!

Brimar trimmings lend a beautiful finishing touch to window treatments, furnishings and accessories. With over 10,000 product choices, a variety of colors, sizes and designs await you. Our styles range from natural beauties in linen, jute and hair-on-hide to novelty trims which are eco-friendly, marvelously metallic, and built for the outdoors.
Our website helps you specify product faster, leaving you more time for clients and creativity.

Our online search tool returns only the trim colors and styles matching your search requirements, eliminating irrelevant options to save you on time.

While online, explore our diverse drapery hardware section. You can search by Collection or Pole Diameter. When landing on that perfect item, you have the ability to log in to check inventory & prices, request finish chips, and order online. Get started by visiting **BRIMARINC.COM**
